

Community Service Opportunity

EDIFY (Educating and Directing Influential Forces with Youth) is looking for youth volunteers to help with a project called *Community Mapping*. We are looking for teams of youth in each school district to gather information about activities and events available for youth in their community using a survey. This project involves the following:

- ☆ Attend a training on Community Mapping in late February– early March
- ☆ Using a survey gather information about events, activities, clubs and youth groups that exist in your community. Information will be collected by making phone calls and/or in person visits to organizations and businesses that run the activities.
- ☆ Information will be compiled for each community throughout the Summer
- ☆ A database of the information will be placed on a website that can be linked to schools and town websites in the Fall
- ☆ Volunteers will be asked to help promote the use of the website in their community

Interested or Need More Information??
